insurance, and stipend) for two years

Starting Semester:Spring 2025

***Looking for candidates with:??**

- * interest or experience with ROBOTICS and/or MECHATRONICS
- * interest or experience with coding such as MATLAB, Python/C++, LABVIEW, or ROS
- * interest or experience in CAD software such as SOLIDWORKS, AUTODESK INVENTOR/FUSION 360, AUTOCAD and electronics design software like AUTODESK EAGLE
- * strong mechanical/electrical modeling skills
- * excellent English oral and writing skills

The research will focus on healthcare and medical robotics design, mathematical modeling and control. The position will involve using rapid prototyping tools like 3D-printing, laser cutting, etc. along with embedded electronics to build and study medical robots for a variety of novel applications.

Submit by e-mail (yash.chitalia@louisville.edu) with a CV attached.

The cover letter must outline your research qualifications and how they align with the requirements of this position.

Requirements: Admission to the Mechanical Engineering department at the University of Louisville will be required.

Application details: <https://louisville.edu/graduate/futurestudents/apply-materials/application?>

Review of applications will continue until the position is filled.
