Sciences, Instructional Design, Curriculum Development, Human Development, or a related field.

Experience in research on skill development, particularly in higher-order cognitive skills, and its assessment is crucial. Proficiency in designing research experiments, data collection, and statistical analysis to explore the relationship between AI-based instructional interventions and learning outcomes is essential. The role demands excellent communication and writing skills in English. Having experience focused on AI-driven educational strategies would be a significant advantage.

The selected candidate will be part of an innovative research team at the forefront of exploring and implementing cutting-edge pedagogical strategies to enhance student learning outcomes in STEM. This includes developing higher-order cognitive skills through advanced educational technologies in Science, Technology, Engineering, and Mathematics education.

Candidates passionate about shaping the future of education and possessing the requisite qualifications are encouraged to apply. Please send a cover letter, and current CV with the names of three references to: [wei.zheng@jsums.edu](mailto:wei.zheng@jsums.edu) with the email subject: POST-EDU.
